TECHNOLOGIES

ATTIX 7

wet and dry vacuum cleaner *

Ergonomic Design

The machine can be moved around in an easy and comfortable manner - even when full. The robust steel chassis also provides practical storage for extension tubes and accessories.

Cable hook and accessory storage

Have everything to hand and store in a tidy fashion.

Silent Operation

The low working noise level makes this machine the quietest in its class. A luxury feature for a comfortable working environment.

PET Coated Filter

Suitable for wet and dry without the need for change. Made from a PET material making it virtually indestructible. 99.95% efficient, keeping the dust inside the vacuum where it belongs!

Superior suction performance

The twin turbine motor produces enough air flow and suction power to give you a better result in less time.

ATTIX 751-11

Speed governor (-21 model only)

To control suction power and noise level and prevent sanders sticking to the working surface when dust extracting.

Versatile Container Handling

The container either tilts or can be lifted off the frame for quick and easy emptying or cleaning.

ED Model (Easy Disposal)

This is a dry only model where the waste is dumped directly into a sturdy disposal bag rather than a container.

EC Drive System (790 -21 EC version)

Brushless, ignition source free single phase EC motor that is electronically regulated for precise power control. In fact the EC drive motor delivers nearly 6% higher air flow than a universal motor for the same energy cost.

- Extended life time
- No sparks or carbon dust from the motor

ATTIX 751-61

This Liquid Vac will pick up water at 200 litres per min and discharge it as far as 9 metres higher and 50 metres away from the site of the flood.

* ATTIX 7-63 ED is a dry vacuum only

230 & 110 volt versions available on ATTIX 751-11 & ATTIX 761-21 XC, all other models 230 volt only.

FILTER CLEANING SYSTEM

XtremeClean
Filter Cleaning System

The XtremeClean technology is based on a valve controlled principle, using the air flow to clean one half of the filter cartridge - despite still working with the other half. The dirt is blasted off the filter and the suction performance is always maintained.

OPTIONAL ACCESSORIES (see product catalogue for further accessories)

Metal Chip Basket

Collects large debris when wet vacuuming
- 302001434

Airbox (For -21 models)

When connected to the Auto On/Off receptacle on the vacuum, and to a pneumatic tool. The airbox turns the machine on/off automatically with the tool. - 302001192/302001474

Vacuuming Kit for -21 model

includes crevice nozzle, brush nozzle, universal nozzle, professional floor tool, extension tubes and 3 metre hose.- 20000252

Spark Extinguisher

Suppresses sparks before they enter the machine - 34591
